School of Mines Notes -- University Club of Socorro.

THE UNDERGROUND WATERS

Special Correspondence.

Socorro, N. M., Nov. 20.—Of great importance to the mining interests of New Mexico is an elaborate report on the underground conditions of the Jornada del Muerto by Dr. Charles R. Keyes. The Monograph deals particularly with the geological structure affecting the conditions governing artesian water supplies of the region. This elaborate memoir will be issued by the School of Mines. It will be finely illustrated by a score of large beautiful plates and several colored maps, one of the latter being a geological sketch map of the region from Socorro to El Paso. So important is this report that the national government will also issue it as one of its special Irrigation Monographs.

Prof. C. L. Herrick, who recently purchased property in Socorro and who has moved his family here, will devote a considerable part of the winter in superintending the surveying and construction of some large irrigation works in New Mexico. He will still keep up an active interest in mining.

R. Harland Case, who has been recently attending the school in the metallurgical department has accepted a lucrative position, with a prominent consulting mining engineer, and has already entered upon his duties in California; he will also spend considerable time in New Mexico and Arizona. Mr. Case is to be congratulated upon this opportunity that has opened up to him to get a broad and varied experience among western mines.

The school has just received a fine set of stereoscopic slides from the Alti-Chambers company, manufacturers of all kinds of mining machinery, of Chicago. The subjects represent a large variety of machinery used in mining and in treating ores. For lecture purposes this series forms a very valuable addition to the equipment of the institution.

During the past two weeks Prof. Hagg and Mr. Dominian have been putting in all time not devoted directly to instruction in arranging and preparing the rock collection for study purposes. Besides the two large Krank collections of foreign rocks from type localities, there are many additions of equally interesting material from this country. The New Mexico series of rock specimens is rapidly growing and the hand specimens are being drawn of the uniform size of 3 by 4 inches. The Krank collections are accompanied by thin slices for study under the microscope. Work will soon be begun on preparing a similar series of thin sections of all the New Mexico rocks.

In the Mineralogical Laboratory the past week has witnessed the installation of more desks for blow pipe work. This enables 12 men to work at a time obviating the division of the classes into so many squads as would have been otherwise necessary.

Mr. G. M. Hamilton has become special correspondent for the Engineering and Mining Journal of New York city. He will represent the southwest in all matters relating to mines, mining and smelting.

Doctor Saylor is hearing these days special classes in algebra in addition to his other school duties.

Royal P. Jarvis, M. E., who was appointed last spring to the chair of machine design and draughting in this institution, but who later, was unable to enter upon his duties owing to his successors inability to take charge of the work at the time it was expected in the big smelter at Torreon, Mexico, has been appointed professor in the science school of Washington State university.

The University Club of Socorro which was recently organized has proved to be a great success. It is composed of college graduates who are associated with the New Mexico School of Mines or live in Socorro. Its flourishing condition is shown by the fact that it already numbers over thirty members.

The main object of the University Club is to keep its members in closer touch with the university life of the world, to encourage university sentiment in New Mexico and to promote intellectual and social life. The present organization is, it is believed, the first college graduate society to be formed in New Mexico.

For its home the members of the University club have leased the Spilling residence, which has been fitted up and partly refurnished and more especially adapted to the needs of such an organization. In the reading room will be found all the latest magazines, several of the leading newspapers and publications of the latest topics of higher educational value.

Provision is made for the entertainment of graduates from abroad and it is expected that at the fortnightly meetings some distinguished university man will give a lecture or read a paper of broad bearing.

The club house is open to its members every day for meeting one another, spending an hour or two in reading or conversation or for recreation.

Underground Waters of New Mexico.
Dr. Charles R. Keyes of the New Mexico School of Mines has just completed the first of a series of memoirs on the Underground Conditions of New Mexico. The report is on the Jornada del Muerto extending from El Paso, 200 miles northward, between the Rio Grande and the Sierra San Andres. It is a belt of land 30 to 40 miles wide and was

long regarded by the early explorers and settlers as devoid of water.

The main object of the investigation has been to determine from the geological conditions the possibilities for obtaining underground waters with moderate depths and especially probabilities for artesian waters.

Geologically the Jornada has been found to be a broad shallow trough, pitching southward. The total amount of pitch is about 1500 feet—the lowest point being at El Paso.

The main part of the Jornada is found to be composed of porous sandstones underlain throughout by compact impervious clays and shales which have a thickness of more than 500 feet.

The conditions point to two important horizons. One is at the base of the surface mesa gravels and the other at the bottom of what is called the great Cretaceous sandstone and immediately above the shales so referred to.

Shallow dug wells are best put down to the base of the mesa gravels which is generally reached within 150 feet of the surface of the plain. Shallow wells may also usually be advantageously sunk in the sandstones when these form the surface rock.

The next important water sheet is probably that lying at the base of the great sandstone bed. In the central part of the plain, as at Engle, this level is about 2,000 feet below the surface, but gradually rises until it reaches the surface on each side a dozen or more miles away. A few miles north of El Paso this water stratum should be reached within 1,000 feet of the surface.

In the south half of the plain, from El Paso northward for 50 miles the indications are that the water supply is artesian in character. The head or main collecting area is from 500 to 1,000 feet above the elevation of this part of the district.

The report will be published as a special publication by the New Mexico School of Mines. The federal government has found it to be of great importance that it will also publish the report as a special volume of its Irrigation Monographs. The report also contains much of importance to the mining industries of the region.

FOR OVER SIXTY YEARS.
An old and well tried remedy.
Mrs. Winslow's Soothing Syrup has been used for over sixty years by millions of mothers for their children with teething with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

HIS EAR BITTEN OFF

One Prospector Chewed the Anatomy of Another at Cananea.

Last week in Cananea, Mexico, during a fight, J. J. Holman, a well known prospector from Bisbee, Arizona, had the loss of his left ear completely bitten off by another prospector named William Bennett, and now the wealthy western mine owner who is looking for an ear can doubtless get one cheap.

The two men were well known to each other and had been in the best terms till they got to drinking beer together, and becoming considerably intoxicated soon engaged in a quarrel, and from that to blows.

During the melee Bennett seized Holman's left ear in his teeth and bit off the greater part of the member. The men then separated, Bennett going over to Sonoyoma.

The police took Holman before Judge Sastelada in Cananea and that official said that he did not intend that such cannibalistic acts should go without proper punishment. Bennett was brought in by the police and after being identified by Holman was locked up.

The latter did not seem much inclined to prosecute, but the officials express a determination to invoke the full penalty for such brutal exhibitions of anger.

Holman, who perhaps does not care to be scattered promiscuously over Cananea, secured the detached piece of ear, and placing it in a box had it in jail shape to exhibit to friends. He is in the employ of Rollins, Mosher and other of Bisbee as a prospector, and has been a resident of Northern Sonora for thirty years.

The maximum penalty in Mexico for mayhem is ten years imprisonment.

BEST LINIMENT ON EARTH.
J. M. Mellany, Greenville, Tex., writes Nov. 2nd, 1903: "I had rheumatism last winter, was down in bed six weeks; tried everything, but got no relief, till a friend gave me a part of a bottle of Ballard's Snow Liniment. I used it, and got two more bottles. It cured me and I haven't felt any rheumatism since. I can recommend Snow Liniment to be the best liniment on earth for rheumatism. For rheumatic, sciatic or neuralgia pains, rub in Ballard's Snow Liniment, you will not suffer long, but will be gratified with a speedy and effective cure. 50c, 50 and \$1.00 at J. H. O'Reilly Drug Co. and Son."

ORANGE GROVE FESTIVAL.
Patrons and Promoters, Visitors and Management, are Equally Well Pleased at the Result.

The matinee this afternoon for the children was largely attended, and the young auditors were highly pleased. The patrons of the New England lunch from 11 o'clock this morning until 2 o'clock this afternoon, were more numerous even than those at the oyster lunch yesterday.

An interesting program will be presented this evening, for all those who have previously attended will go again and all those who have not attended will avail themselves of this evening, for it is the last opportunity.

After the program tonight there will be an auction of the articles as mentioned on hand.

More Indian Curios.
George A. Dorsey, Ph. D., curator of the Columbian Field museum, is in the city again after a trip to Hopi land. Hopi is the name which the doctor

SCROFULA A DISEASE WE INHERIT.

Scrofula manifests itself in many ways. Swelling of the glands of the neck and throat, Catarrh, weak eyes, white swelling, offensive sores and abscesses, skin eruptions, loss of strength and weakness in muscles and joints.

It is a miserable disease and traceable in almost every instance to some family blood taint. Scrofula is bred in the bone, is transmitted from parent to child, the seeds are planted in infancy and unless the blood is purged and purified and every atom of the taint removed, it is sure to develop at some period in your life.

Normously equals S. S. S. as a cure for Scrofula. It cleanses and builds up the blood, makes it rich and pure, and under the tonic effects of this great Blood Remedy, the general health improves, the digestive organs are strengthened, and there is a gradual but sure return to health. The deposit of tubercular matter in the joints and glands is carried off as soon as the blood is restored to a normal condition, and the sores, eruptions, and other symptoms of Scrofula disappear.

S. S. S. is guaranteed purely vegetable and harmless; an ideal blood purifier and tonic that removes all blood taint and builds up weak constitutions. Our physicians will advise without charge, all who write us about their case. Book mailed free.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

uses for the Mokai Indians, as they are generally called. He says the latter name is a Navajo mispronunciation of the former and true name of the people. When seen by a Citizen reporter Mr. Dorsey was examining a consignment of whistles and spindles, just received from Vancouver, B. C. They are Indian instruments, the whistles being used in the religious dances of the tribe and the spindles for spinning wool, which they largely use in blanket weaving. Each spindle passes through a highly polished piece of bone, nicely rounded and about one and a half inches in diameter.

In the south half of the plain, from El Paso northward for 50 miles the indications are that the water supply is artesian in character. The head or main collecting area is from 500 to 1,000 feet above the elevation of this part of the district.

A REMARKABLE CASE.
One of the most remarkable cases of a cold, deep-seated in the lungs, causing pneumonia, is that of Mrs. Gertrude E. Ferner, Marion, Ind., who was entirely cured by the use of One Minute Cough Cure. She says: "The coughing and straining so weakened me that I ran down in weight from 115 to 75 pounds. I tried a number of remedies to no avail until I used One Minute Cough Cure. Four bottles of this wonderful remedy cured me entirely of the cough, strengthened my lungs and restored me to my normal weight, health and strength." Sold by B. H. Briggs & Co. and S. Vann & Son.

Ledged in County Jail.

One bicycle thief, who was not wily enough to escape the officers of the law, was sent to the county jail from Judge Crawford's court this morning to serve sixty days. He is one Kelly, who sold a bicycle to R. L. Dodson for \$25.00. The wheel was taken from the Hopping bicycle works by a woman living at the Badaracco gardens. Kelly has been around the gardens, and was easily traced as the thief. He pleaded guilty, but wheel stealing must stop, says the majesty of the court, and "sixty days" was registered next Kelly's name.

A GOOD NAME.
From personal experience I testify that De Witt's Little Early Risers are unequalled as a liver pill. They are right named because they give strength and energy and do their work with ease—W. T. Easton, Boone, Tex. Thousands of people are using these tiny little pills in preference to all others, because they are safe and efficient. They cure biliousness, torpid liver, jaundice, sick headache, constipation, etc. They do not purge and do not irritate. They strengthen. Sold by B. H. Briggs & Co. and S. Vann & Son.

A Tally-Ho Party of Little People.
Saturday afternoon Mrs. B. S. Baker gave a tally-ho party in honor of her little niece, Kathryn Lineburg, who is to leave for Omaha Tuesday night. Judge and Mrs. Baker accompanying the little lady back to Omaha. Thirty-three little friends were entertained by a drive around town, afterwards going to the matinee at the Orange Grove festival. The children were chaperoned by Mrs. Baker, Mrs. McGaffey, Mrs. Lester, Mrs. Putney and Mrs. Edward Cramfield.

A SCIENTIFIC DISCOVERY.
Kodol Dyspepsia Cure does for the stomach that which it is unable to do for itself, even when it is slightly disordered or overworked. Kodol Dyspepsia Cure supplies the natural juices of digestion and does the work of the stomach, relaxing the nervous tension, while the flamed muscles of that organ are allowed to rest and heal. Kodol Dyspepsia Cure digests what you eat and enables the stomach and digestive organs to transmit all food into the red blood. Sold by B. H. Briggs & Co. and S. Vann & Son.

Bright Young Life Ended.
George, the nine-year-old son of Mr. and Mrs. W. F. Biedson, 711 North Second street, died last night, after an illness of but a few days. A private funeral took place today at the family residence. George was a great favorite with all who knew him, and will be greatly missed by his bereaved parents and his little schoolmates. Death is sad at all times but never more so than when it cuts down a child upon whom many hopes have been placed, and ends a life full of promise.

CURED OF PILES AFTER 40 YEARS.
Mr. H. H. Hanes, of Geneva, O., had the piles for 40 years. Doctors and medicine could not cure him. De Witt's Hazel Salve cured him permanently. Invaluable for cuts, burns, bruises, sprains, lacerations, eczema, tetter, salt rheum, and all other skin diseases. Look for the name De Witt on the package—all others are cheap, worthless counterfeits. Sold by B. H. Briggs & Co. and S. Vann & Son.

LOST BOY FOUND.

At Bottom of a Placer Hole, With a Broken Leg and Hungry.
Weak from hunger and loss of blood and suffering from a broken leg, with the bone protruding through the flesh just above the knee, Abel, the twelve-year-old son of Jesus Baca, of San Pedro, was found at the bottom of a placer mine hole in canyon San Lazarus where he had lain since Thursday, a period of forty-eight hours. His condition is so serious that his life is almost despaired of and his recovery doubtful.

The Citizen's correspondent at San Pedro, says: "On Thursday evening Abel Baca, a twelve-year-old son of

150 South 5th Street.

Scrofula appeared on the head of my little son when only 18 months old, and spread rapidly over his body. The disease next attacked the eyes and we feared he would lose his sight. Several physicians were consulted, but could do nothing to relieve the disease. It was then that we decided to try S. S. S. That medicine at once made a speedy and complete cure. This is now a young lady, and has never had a sign of the disease to return.

MRS. RUTH BERKLEY, Salina, Kan.

Jesus Baca of this place, failed to come home at the regular time. He had been out with his father's goats and was last seen about 4 o'clock near the San Lazarus mine where he had taken the goats for water. On Friday nearly the whole community turned out to search for the boy but without success. The searching continued till Saturday afternoon when the boy was found lying at the bottom of a fifteen foot placer hole in San Lazarus gulch, where he had accidentally fallen. His right leg is broken above the knee.

DOESN'T RESPECT OLD AGE.
It is shameful when youth fails to show proper respect for old age, but just the contrary in the case of Dr. King's New Life Pills. They cut off malaria, no matter how severe and irrespective of old age. Dyspepsia, jaundice, fever, constipation all yield to this perfect pill. 25 cents at all druggists.

The Optic says: Mrs. R. G. Gifford's brother, Mr. Kiser, was relating this morning his experience in the wreck of the limited train last week. He was on the platform passing from the diner to a Pullman when he felt the jar of the trucks inside the Pullman which fortunately lodged on the grade without upsetting. The escape of this train from any serious result of the derailment is one of the amazing incidents in railroad history.

WORM DESTROYER.
White's Cream Vermifuge not only kills worms but also the same causes making human vermin of sufferers from throat and lung troubles. But since the advent of Dr. King's New Life Pills, the worst cases can be cured, and hopeless consumption, coughs and croup, even the most obstinate, can be cured. Dr. King's New Life Pills is a safe, reliable, and effective remedy. Sold by B. H. Briggs & Co. and S. Vann & Son.

A RUNAWAY BICYCLE.
Terminated with an ugly cut on the leg of J. B. Orner, Franklin Grove, Ill. He developed a stubborn ulcer yielding to doctors and remedies for four years. Dr. King's New Life Pills cured it. It is as good for burns, scalds, skin eruptions and piles. 25 cents at all druggists.

COL LLEWELLYN EXPLAINS.
As to his Interview Concerning Chairman Hubbell in the El Paso Evening News.

The following letter from Colonel W. H. H. Llewellyn of Las Cruces, referring to a recent editorial upon the interview with his name which recently appeared in the El Paso Evening News, explains itself. Colonel Llewellyn writes:

"Las Cruces, N. M., Nov. 18, 1903.
"Editor New Mexican:
"I notice in an editorial in your excellent paper of yesterday a reference to myself regarding a recent interview with me in an El Paso paper. In said interview as I remember it, and I do not think I am mistaken, the statement that I made was that I understood that Mr. Hubbell's defense would be that he had drawn the money for his services as school superintendent of Bernalillo county in advance and that he afterwards performed the services. This was in substance my statement as contained in the interview referred to. I do not know if this is Mr. Hubbell's defense or not, as I never had any conversation with him on the subject, but as stated in said interview that was what I had been informed was his defense or would be his defense. If you will kindly make the correction, I will be obliged to you.

"Yours truly,
"W. H. H. LLEWELLYN."

JUST WHAT YOU NEEDED.
Chamberlain's Stomach and Liver Tablets.
When you feel dull after eating.
When you have no appetite.
When you have a bad taste in the mouth.
When your liver is torpid.
When your bowels are constipated.
When you have a headache.
When you feel bilious.
They will improve your appetite, cleanse and invigorate your stomach, and regulate your liver and bowels. Price 25 cents per box. For sale by all druggists.

GREAT SOCIAL EVENT.
The Light Fantastic Too Pursues the Flying Hours with Winged Feet. Social Event Near Estancia.

On last Tuesday night at the McGillivray ranch, near Estancia, there was a high time. Mr. and Mrs. Dunca McGillivray, recently married in this city, came to their home from spending their honeymoon at Colorado Springs. Having fooled the people in the home neighborhood by their marriage in Albuquerque, the home people determined to be revenged. So there gathered at the McGillivray ranch, on Tuesday evening, one of the most brilliant assemblages ever known in that part of the territory. Every body was there with his wife and children, and in the absence of the latter somebody else's wife and children.

To say that the affair was at McGillivray's was a high time. Mr. and Mrs. Dunca McGillivray, recently married in this city, came to their home from spending their honeymoon at Colorado Springs. forthcoming, or the two children would be put off the train. The woman then paid the extra fares asked. As far as the Citizen has been able to learn, Conductor Gifford acted the gentleman, but the woman—well, she used her tongue pretty strongly against the conductor, and let out some words that would not look well in print.

A Las Vegas Runaway.
There was a rather exciting runaway this afternoon and Faustina Estaban proved a hero. A. J. Venz's stalled delivery horse got wheels in his gray matter and wings on his pedal extremities. He came dashing down Grand avenue, delivery wagon attached, at great speed. Faustina Estaban rushed from somewhere and grabbed his bridle. He held on a minute, but the rabid animal proved too speedy, and Faustina went under the wheels. Nothing daunted, he was up and away in a jiffy. He nabbed the "critter" again, and this time held on. Faustina's good clothes were disfigured and it is up to Mr. Venz to give him a new pair of overalls. The wagon seat lost its balance in the confusion and, falling where the ground was hard, was broken. No other damage—Optic.

THE BEST REMEDY FOR COUGHS.
From the Atchison, Kan. Daily Globe. This is the season when the worst who knows the best remedies for coughs is in demand in every section of the country. One of the most effective things in the world is to be awakened in the middle of the night by a cough from one of the children. The cough remedies are almost as sure to be lost in case of cough as a revolver is lost in case of burglars. There used to be an old fashioned remedy for cough, known as hives syrup and told, but some modern mothers say that Chamberlain's Cough Remedy is better, and does not cost so much. It causes the patient to "throw up the phlegm" quicker, and gives relief in a shorter time. Give the remedy as soon as the coughy cough appears and it will prevent the attack. It never fails and is pleasant and safe to take. 25 cents at all druggists.

Railroad Dynamites.The railroad dynamites, which have been causing so much trouble in the north seem to have imitators in the southwest, says the Lordsburg Liberal. Saturday night the water tank owned by the El Paso & Southwestern road at Rodeo was dynamited. The road had not been warned, nor been asked for blackmail. There has been some trouble between the railroad men and Wm. B. Bond over the right-of-way. Bond having made a homestead claim that covered the right-of-way, but this case was in the court and was to come up Monday, and Bond was at Silver City to attend court at the time the dynamiting was done. The tank is a huge steel affair; sits on a stone foundation. The tank was not entirely destroyed, but was leaking badly, and will have to be taken down before it is repaired. At latest account there was no clue to the perpetrator of this dastardly affair.

To say that the affair was at McGillivray's was a high time. Mr. and Mrs. Dunca McGillivray, recently married in this city, came to their home from spending their honeymoon at Colorado Springs. Having fooled the people in the home neighborhood by their marriage in Albuquerque, the home people determined to be revenged. So there gathered at the McGillivray ranch, on Tuesday evening, one of the most brilliant assemblages ever known in that part of the territory. Every body was there with his wife and children, and in the absence of the latter somebody else's wife and children.
